

NEW FROM MAPTSOFT

VIBRATION & TEMPERATURE MONITORING

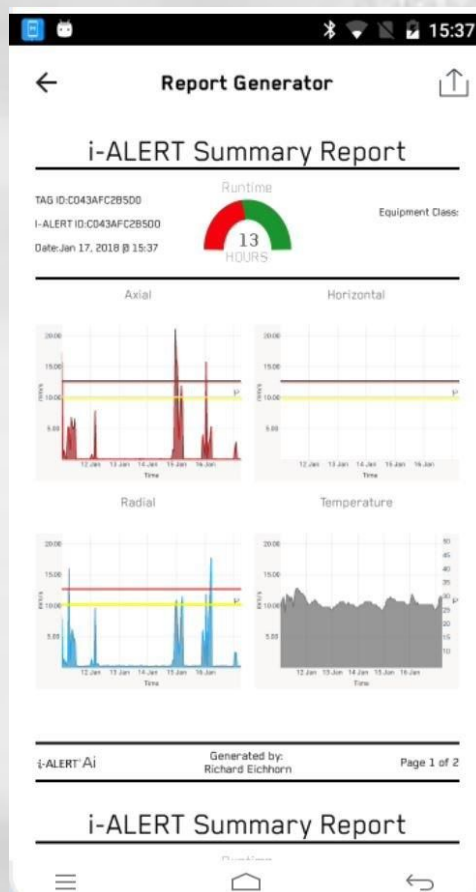

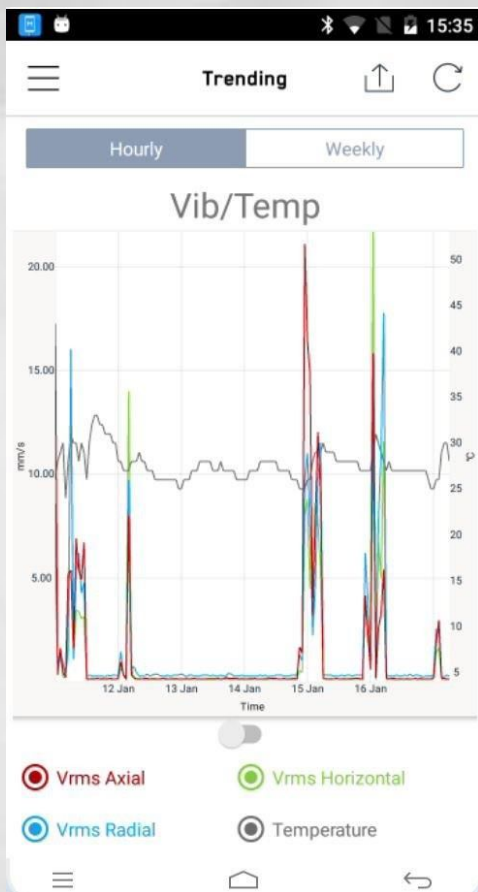

Temperature and Vibration Sensor easily attaches to critical equipment

Data syncs wirelessly to Maptsoft handheld via Bluetooth

BENEFITS

- Allows for early detection of potential equipment failure
- Provides vibration, temperature, run-time monitoring
- Data logging & graphing with trend analysis
- Advanced vibration analysis tools
- Real time access to machine record data
- Wireless syncing to Maptsoft devices
- Intrinsically safe for hazardous environments
